

860 P.T.O. Harvester

Flory Industries is pleased to introduce the **Flory Model 860** to its proven line of P.T.O. harvesters.

- The Model 860 utilizes a large, low-speed suction fan that produces superior cleaning without excessive wear and dust emission.
- Hydraulic motors provide dependability and smooth operation to the pickup and conveying systems.
- Standard features include an adjustable hydraulic hitch.
- Easy change over from one type of crop to another.
- For complete details on how the **Flory Model 860** can reduce dust or speed up harvest in your conditions, please contact the factory.
